

Checklist

Why the pre-check?

We recommend you to examine your smartphone and the spare part in detail before and after every repair. That way you cannot overlook any faults and make sure that your repair is successful.

Only remove seals and protective films from the spare part – displays in particular – when it looks flawless.

Let's go

01 – Pre-check

Start by testing central functions of your smartphone using our checklist. Also check the spare part for visual defects such as cracks, defective cables or detached parts right after unpacking.

02 – Instruction

Our freely available instructions will guide you step by step through the repair process. You can obtain the relevant picture and video instructions for your smartphone model at www.idoc.eu/-guides or www.idoc.eu/youtube.

03 – You need help?

Use the comment function under the individual steps of the repair instructions for questions. You will receive feedback from our technicians or the community.

04 – Final-check

Have you successfully completed the repair? Then test all functions again using our checklist on the back.

05 – Your applause

We are glad if you were able to repair your smartphone on your own and if our instructions helped you. Share your repair experience and follow us.
